

WINTER SCHOOL

Categorification, representation theory and symplectic geometry

Organizers: Anne-Laure Thiel, Daniel Tubbenhauer

Dates: November 20-24, 2017

Venue: HIM lecture hall, Poppelsdorfer Allee 45, Bonn

There is a fruitful interplay between categorification, representation theory and symplectic geometry, and our intention is to highlight some of it in detail. This winter school is mainly directed at PhD students and young postdocs. We hope to bring together researchers as well as students who want to learn more about the various presented aspects of these broad fields.

Lecturers:

- Eugene Gorski (*University of California, Davis*)
- Yankı Lekili (*King's College, London*)
- Andrew Mathas (*University of Sydney*)
- Volodymyr Mazorchuk (*Uppsala University*)
- Catharina Stroppel (*Universität Bonn*)

Call for participation: Financial support for PhD students and postdocs is available. Please send applications (including a letter of intent, a CV, and a letter of recommendation) using the online application form at <http://www.him.uni-bonn.de/representation-theory-2017/winter-school/>. The deadline for applications is: July 31, 2017.
